EDUCATION

University of Michigan

April 2026

Bachelor of Science in Computer Science

Ann Arbor, MI

- **GPA: 3.4/4.0**
- **Relevant Coursework:** Information Retrieval Systems, Computer Networks, Intro to Computer Security, Database Management Systems, Intro to Computer Organization, Data Structures and Algorithms 1-2, Discrete Math, Calculus 1-2, Intro to Statistics and Data Analysis, Spanish 1-4
- **Certifications:** CompTIA Security+

WORK EXPERIENCE

Ruoff Mortgage

May 2025 – August 2025

IT Security Analyst Intern

Fort Wayne, IN

- Analyzed 300+ phishing attempts using PhishER, Mimecast, and VirusTotal to identify threats and prevent credential and information compromise
- Led the phishing awareness program for a company of 600+ people, improving phish report rates by 10%
- Conducted incident response with Security Onion and CrowdStrike Falcon, documenting cases through Jira
- Developed an automated Python script to identify sensitive data held on devices company-wide, reducing task time by over 4 hours
- Led and organized a department-wide tabletop exercise to revise incident response processes
- Documented phishing and incident response playbooks to improve onboarding of new employees

University of Michigan Information and Technology Services

September 2024 - January 2025

Computer Consultant I

Ann Arbor, MI

- Transported 300+ computers, printers, and related supplies between 12 designated campus locations to IT offices
- Managed and updated 100+ service tickets in the inventory management system to accurately reflect equipment moves and changes

WolvSec Cybersecurity Club

Oct 2024 - Present

Member

Ann Arbor, MI

- Solved CTF challenges using various tools and techniques such as VMWare, Wireshark, Ghidra
- Identified and exploited vulnerabilities via applied knowledge of forensics, web and binary exploits
- Attended cybersecurity talks by industry professionals, gaining insight into network defense, threat detection, and best practice

PROJECTS

MITRE cCTF

- Worked in a team environment to build and harden an embedded system in C against active attackers, balancing security, performance, and reliability.
- Implemented secure access control and session protection mechanisms using modern cryptographic primitives and structured key derivation.

Language-Learning App

- Developed 60+ RESTful API endpoints for an AI language-learning app backend, enabling seamless frontend integration and enhancing user experience
- Led communication with a Czech partner company and frontend team, facilitating productive weekly meetings that ensured alignment and timely achievement of project goals

Personal Homelab

- Built a personal homelab using a Raspberry Pi running Pi-hole for network-wide ad blocking and custom DNS/DHCP, configured WireGuard VPN for secure remote access, and maintained a Windows + VMware lab environment for virtualized testing.

TECHNOLOGIES, SKILLS

- Languages: Python, C/C++
- Security Tools: CrowdStrike Falcon, Security Onion, Mimecast, PhishER, Cisco Umbrella, VirusTotal, Wireshark, Ghidra, VMWare
- Other: Jira, Microsoft Office (MOS Certified), Git, Mac, Windows, Linux
